

# Nguyen Anh Tan

## SENIOR FRONTEND ENGINEER — REACT / TYPESCRIPT

---

Ho Chi Minh City, Vietnam · +84 357833112 · tanna48pct@gmail.com · github.com/tannguyen208 ·  
Portfolio: github.com/tannguyen208/resume

## SUMMARY

---

Senior Frontend Engineer with ~8 years building scalable, accessible web products in **React and TypeScript**. Specialize in frontend architecture, reusable component/design systems, and state management at scale, backed by full-stack fluency (Node.js / NestJS, REST & GraphQL). Proven technical leader — led frontend teams of up to 7 engineers, owned architecture and code-review standards, and mentored developers. Recent focus on **LLM / AI-agent integration** and **high-throughput real-time data UIs** (rendering ~3,000 location beacons/second).

## EXPERIENCE

---

### Vitalify Asia | Software Engineer (Senior Frontend) | Aug 2022 – Present

*Ho Chi Minh City, Vietnam*

Own frontend architecture and shared component libraries for client web products across agile teams of 3–6 engineers; deliver features end to end into Node.js / NestJS / PostgreSQL backends and drive internal AI-agent tooling.

- Delivered **4 production web applications** in React, Vue, and Next.js — **2 of which became the company's most successful client products** — by owning the frontend architecture and a reusable component library shared across teams of 3–6 engineers.
- Increased user support-ticket deflection by **~30%** and cut content-ops effort by **~8 hours/week** by integrating **LLM-powered features** (conversational chatbots and an AI writing assistant) into client products and owning the streaming-response UI and integration layer.
- Cut feature delivery time by **~25%** across **5+ projects** by architecting an internal **AI-agent and automation framework** — a reusable library of “skills” and workflows (planning, design system, code, review, deploy, ship) built on Claude and Codex.
- Shipped **20+ features** end to end and cut frontend↔backend handoff time by **~40%** by designing and integrating REST APIs and backend services with Node.js / NestJS and PostgreSQL.
- Raised automated test coverage from **~40% to ~80%** and reduced regression defects by **~35%** by introducing a **React Testing Library + Playwright** suite and enforcing coverage gates in CI.
- Improved Core Web Vitals (**LCP ~3.4s → ~1.6s, Lighthouse ~72 → ~95**) and cut initial JS bundle by **~45%** through route-based **code-splitting, lazy-loading, and memoization**.

### Key Projects

- **Colors** — *Vue, NestJS, TypeScript, AWS* — Full-Stack Developer (team of 5)
  - Built the UI and core features of a web app that generates family trees from PDF documents, processing **~300 documents/day**, by implementing the PDF-parsing-to-tree-rendering flow in Vue against a NestJS API.
- **OMRON Pressure** — *ReactJS, PHP, AWS* — Full-Stack Developer (team of 4)
  - Delivered a blood-pressure measurement app end to end, supporting **~1000 active users**, by implementing core measurement-tracking and history features in React against a PHP backend.

### FPT Software | Software Engineer, Frontend Team Lead (Contract / Project-based) | Aug 2021 – Feb 2022

*Da Nang, Vietnam*

Led frontend delivery for an enterprise tour-management platform, owning architecture, code-review standards, and mentoring within a 7-person project team.

### Key Projects

- **NTA UniNext** — *ReactJS, Redux, Navitime API, MapScript* — Frontend Team Leader (7 engineers / 32-person project)
  - Delivered a tour-management platform on schedule for a third-party travel client by leading a **7-person team** — defining the front-end architecture, establishing code-review standards, and mentoring engineers on React/Redux best practices — reducing defect rate by **~30%**.
  - Cut route-planning latency by **~35%** by integrating Navitime mapping APIs and MapScript for routing and location services and packaging them into reusable map components.

### Sutrix Solutions | Software Developer (Contract / Project-based) | Oct 2020 – Jul 2021

*Ho Chi Minh City, Vietnam*

Built cross-platform mobile features to client specifications for a 5G SIM e-commerce product.

### Key Projects

- **Gomo PH** — *Flutter, Dart, MobX, DIO* — Mobile / Frontend Developer
  - Delivered **25+ screens** for a cross-platform app to purchase 5G SIMs with international connectivity, by building the Flutter (Dart) client with MobX state management and DIO networking, improving crash-free rate to **~99.5%**.

### FPT Software | Software Engineer (Frontend) | Sep 2019 – Oct 2020

*Da Nang, Vietnam*

Built high-throughput, real-time frontend features for an enterprise worker-safety monitoring platform.

### Key Projects

- **Dialog ORION — Real-time Location System** — *Angular 8+, RxJS, NgXS, OpenLayers, StimulsoftJS* — Frontend Developer (team of 24)
  - Rendered real-time location data streamed from **~3,000 beacons/second** with no UI lag, keeping map render under **~16 ms (60 fps)**, by architecting an RxJS / NgXS data pipeline and optimizing OpenLayers layer rendering.
  - Shipped danger-alert notifications and Excel/report exports (StimulsoftJS), established the project structure, and resolved **50+** technical issues while supporting the frontend team.

### Softech | Software Developer | Mar 2018 – Aug 2019

*Da Nang, Vietnam*

Built web and mobile clients for an online English-learning platform.

### Key Projects

- **Ames English** — *ReactJS, React Native, Redux, Redux-Saga* — Developer (team of 12)
  - Built core web and mobile features for an English-learning platform covering all four skills (listening, speaking, reading, writing), serving **~20,000 students and teachers**, by implementing shared Redux / Redux-Saga state and reusable UI across React and React Native.

## SKILLS

---

**Core Expertise — Frontend & Architecture:** TypeScript, JavaScript (ES6+), React, Next.js, Redux / Redux-Saga, React Query, Tailwind CSS, styled-components, component-driven & design-system architecture, responsive & accessible UI, state management, HTML5 / CSS3, OpenLayers (data-viz / maps), Vite / Webpack

**Testing & Quality:** Jest, React Testing Library, Cypress, Playwright, unit / integration / E2E, TDD, CI coverage gating

**Performance:** Core Web Vitals, Lighthouse, code-splitting & lazy-loading, bundle analysis, memoization, React Profiler

**AI & Automation:** LLM / AI feature integration (chatbots, streaming UIs), AI-agent & automation frameworks (Claude, Codex)

**Secondary Skills / Other Exposure:** Node.js, NestJS, Express, REST APIs, GraphQL · Vue, Angular · React Native, Flutter (Dart) · .NET / C#, PHP / WordPress · PostgreSQL, MySQL, SQL Server, MongoDB, Firebase · AWS, Docker, CI/CD · Git, Figma

## AWARDS & RECOGNITION

---

- **Best Performance Member** — Vitalify Asia (~FY2023) · Recognized for consistently high-impact delivery across client products and internal AI-tooling initiatives.
- **Best Performance Member** — FPT Software (~FY2020) · Recognized for outstanding technical delivery and frontend-team support on the real-time tracking platform.

## OPEN SOURCE & COMMUNITY

---

- **AI ChatPad** — Open-source ChatGPT-style chat UI in React / TypeScript with streaming responses. Live: [tannguyen208.github.io/chatgpt](https://tannguyen208.github.io/chatgpt) · Code: [github.com/tannguyen208/chatgpt](https://github.com/tannguyen208/chatgpt)
- **ReactJS Course Mentor** — **Udemy** (3 months) · Mentored 10+ learners on React fundamentals and component best practices.

## EDUCATION

---

**Diploma in Software Engineering** — Aptech Computer Education (Softech Aptech)

*Da Nang, Vietnam · 2016–2018*
