SUMMARY

Senior Frontend Engineer (~8 yrs) specializing in React/TypeScript and scalable UI architecture, with backend experience across Node.js and REST APIs. Ships polished, accessible products and works effectively across the full stack.

EXPERIENCE

Software Engineer — Vitalify Asia

Ho Chi Minh City, Vietnam · Oct 2022 – Present

- Built and shipped 4 web applications using ReactJS, VueJS, and NextJS within agile teams of 3–6 engineers, with 2 becoming the company's most successful client products.
- Integrated LLM-powered features, including conversational chatbots, into client products while owning the frontend architecture and reusable component libraries.
- Designed an internal AI agent and automation framework — a shared library of reusable “skills” and workflows (planning, design system, code, review, deploy, ship), leveraging tools like Claude and Codex to accelerate delivery across projects.
- Designed and integrated REST APIs and backend services with Node.js / NestJS and PostgreSQL, delivering features end to end across the stack.

Software Engineer — FPT Software

Da Nang, Vietnam · Aug 2021 – Jan 2022

- Led a cross-functional team of 7 engineers building web applications for enterprise clients, with a React front end and a .NET backend.
- Drove front-end architecture, code reviews, and technical decisions, ensuring consistent quality and on-time delivery.
- Integrated React front ends with .NET REST APIs and mentored teammates on React best practices.

Software Developer — Sutrix Solutions

Ho Chi Minh City, Vietnam · Jan 2021 – Apr 2021

- Developed web features with React and built a cross-platform mobile app with Flutter, delivering responsive UIs to client specifications.

Software Engineer — FPT Software

Da Nang, Vietnam · Sep 2019 – Oct 2020

- Developed and maintained web application features for outsourced enterprise projects using Angular, contributing across the full development lifecycle.
- Built responsive UIs and integrated REST APIs, collaborating with QA to diagnose and resolve defects.

Software Developer — Softech

Da Nang, Vietnam · Jul 2018 – Mar 2019

- Built web and mobile features using React and React Native as part of the development team, gaining hands-on experience across the full development cycle.
- Implemented responsive interfaces and resolved bugs to improve application stability and usability.

PROJECTS

Colors — Vue, NestJS

- Web app that generates family trees from PDF documents.

- Full-stack developer in a 5-person team — contributed to UI design and implemented core features with Vue and NestJS; delivered with Git, AWS, and Redmine.

OMRON Pressure — ReactJS, PHP

- Full-stack development of a blood pressure measurement app within a 4-person team.
- Implemented core features end to end with ReactJS and PHP; delivered with Git, AWS, and Backlog.

NTA UniNext — ReactJS, Redux, Navitime API, MapScript

- Tour-management platform built for a third-party travel client by a 32-person project team.
- As Frontend Team Leader, led the 7-person frontend team — defined the front-end architecture, implemented core features in ReactJS/Redux, and owned code reviews and developer support.
- Integrated Navitime mapping APIs and MapScript for routing and location services; delivered with Git, Azure, and Jira.

Gomo PH — Flutter / Dart (Java backend)

- Cross-platform mobile app for purchasing 5G SIMs with international connectivity.
- Built the Flutter (Dart) client; backend in Java by other engineers.

Dialog ORION — Angular, OpenLayers (.NET backend)

- Real-time web app for tracking workers' locations and pushing alert notifications when a worker is in danger.
- Built the Angular front end with OpenLayers maps (backend in .NET by other engineers), rendering real-time location data streamed from ~3,000 beacons per second.

Ames English — React Native (.NET backend)

- Mobile app for an English-learning platform used by students and teachers, offering guided practice across all four skills: listening, speaking, reading, and writing.
- Developed the React Native client within a 4-person team (backend built in .NET by other engineers).

SKILLS

- **Languages:** TypeScript, JavaScript, PHP, C#, Dart, HTML/CSS, SQL
- **Frontend:** React, Next.js, Redux, React Query, Tailwind CSS, styled-components, OpenLayers (also Vue, Angular)
- **Mobile:** React Native, Flutter
- **Backend:** Node.js, NestJS, Express, REST APIs, GraphQL (also .NET, PHP / WordPress)
- **Databases:** PostgreSQL, MySQL, SQLServer, MongoDB, Firebase
- **Cloud & DevOps:** AWS, Docker, CI/CD
- **Tools:** Git, Jest, Vite / Webpack, Figma

EDUCATION

Diploma in Software Engineering — Aptech Computer Education (Softech Aptech)

Da Nang, Vietnam · 2016–2018
